

01

FRONT-RUNNING HIGH TECHNOLOGY ADHESIVE

DrSails® **patented technology** has been created by sailors for sailors as the optimal solution for an increasing adhesive bonding demand in a highly demanding market

02

VERSATILITY: HUNDREDS OF SOLUTIONS

DrSails® has been developed to satisfy anyone's needs in any situation given. From children to professionals, the technology's versatility aims to **bond virtually any kind of material***

03

FROM THE MOST DEMANDING ONES TO YOUR HANDS

After first years of development along the high-competition sailing teams, DrSails® has stepped beyond offering our **technology to the most demanding worldwide users**

04

HIGH RESISTANCE BONDINGS

Touching base on the limitless material applications, DrSails® bondings are long-lasting, non-reactive and tough against service conditions (environmental and chemicals)

05

STRENGTH AND FLEXIBILITY

And if we matched in the same technology **the strength of an epoxy with the flexibility of a polyurethane?** With DrSails® we are able to absorb impact or vibrations' energy even in flexible substrates

06

NO MATTER THE CONDITIONS ARE: ALWAYS READY

DrSails®' technology lets us reach bondlines in any fixing conditions: **cold or warm, dry or wet, even underwater** (fresh or salty). In **20 min at room temperature is set** and ready

07

CHILDPROOF GAME

Our range of products have been developed **thinking in every single detail** to be used in the easiest way. Improving user experience in every application even in the simplest one

08

ACCURATE SOLUTIONS

The daily development of DrSails® products and technology lets us, depending on the reference, to be the best solution to **reach the expected goals**

09

CLEAN BEFORE, DURING AND AFTER

In every DrSails®' product we take care of everything to be **used in a clean way**. The product remains in **perfect conditions over best before date** even reopened. **Once cured, ageing is not expected**
